Exposed Ceiling Joists. Connect all wiring for housing before ceiling installation.

**Step A:** Adjustable Mounting Rails anchor housing to ceiling joists with screws. Housing can be adjusted vertically.

**Step B:** After housing is secured, install panel collar into housing.

**Step C/D:** Secure panel collar to housing by screwing (clockwise) into housing. Bottom of collar is installed before ceiling is put in. Collar cannot be below ceiling as this will adversely affect panel ceiling installation.

**Step E:** Install base ceiling and cutout round opening in ceiling to fit around collar diameter. **Step F:** Start installing panel ceiling over existing base ceiling. Cutout round area for panels to fit and conceal the panel collar.

**CLOSEUP**
Panel collar screws into housing throat

**CONNECTION**
Finalize wiring installation before putting light fixture into ceiling

**5 7/8” (130 MM) BASE CEILING CUTOUT**

**1 8” (3 MM) MAX**

**4 1/4” (105 MM) WOOD CUTOUT**

**4 1/8” (30 MM) MAX**

---

**Instruction sheet for Panel (Wood, Metal)**
Install 1000, 1001, 1016, 1250

---

**Important**
Ball plunger on round trim needs to click into grooves in receiver

**1016 & 1250** uses Ball Plunger locking system

**1000 & 1001** uses J-hook. Align J hook with pin on housing, turn clockwise to lock

*Trim in view is 1016- Round Panel trim

---

Final step is to make sure trim is locked using either ball plungers or J-hook
