Exposed Ceiling Joists. Connect all wiring for housing before GWB installation.

Step A: Adjustable Mounting Rails anchor housing to ceiling joists with screws. Housing can be adjusted vertically. See Details above.

Step B: After housing is secured, finish ceiling installation.

Step C/D: Flanged collar gets screwed into housing. This is required for proper installation of round trim.

Step E/F: Flanged collar should be installed after painting, wood, metal ceiling has been prepped.

Step G: Screw flanged collar into housing and then lock trim into collar.

**IMPORTANT**
Ball Plunger on round trim needs to click into grooves in receiver.

1016 & 1250 uses Ball Plunger locking system

1000 & 1001 uses J-hook. Align J hook with pin on housing, turn clockwise to lock

*Trim in view is 1250- Round Flange Trim

Final step is to make sure trim is locked using either ball plungers or J-hook.
