

Exposed Ceiling Joists. Connect all wiring for housing before GWB installation

Step A- Adjustable Mounting Rails anchor housing to ceiling joists with screws. Housing can be adjusted vertically. See Details above.

Step B- After housing is secured, finish ceiling installation.

Step C/D- Flanged collar gets screwed into housing. This is required for proper installation of round trim.

Step E/F- Flanged collar should be installed after painting, wood, metal ceiling has been prepped.

Step G- Screw flanged collar into housing and then lock trim into collar.

IMPORTANT
Ball Plunger on round trim needs to click into grooves in receiver
